SILAGE WRAP FILM
DATA SHEET

REINLAND
SILAGE WRAP FILM

High-performance agricultural film for airtight wrapping of forage and silage bales, for good fermentation and feed preservation.

ABOUT THE PRODUCT

REINLAND silage wrap protects animal feed from oxygen, moisture and contamination. The film gives strong cling and mechanical strength for a tight seal during wrapping and long-term storage. It runs on standard silage wrapping machines and is made for varying climates. Widely used by dairy farms, fodder producers and agricultural contractors. Made by Aarya Plastopet in Karnataka, India.

FEATURES

HIGH PUNCTURE AND TEAR RESISTANCE
Durable through wrapping, handling and outdoor storage, reducing the risk of film damage.

EXCELLENT CLING
Strong layer-to-layer adhesion for an airtight seal and stable bales.

UV STABILISED FOR OUTDOOR STORAGE
Formulated to withstand long exposure to sunlight under normal outdoor storage.

PERFORMANCE

- Reliable airtight sealing for effective fermentation
- High puncture and tear resistance during wrapping and handling
- Stable performance in varying climates
- Consistent winding for smooth machine operation

TECHNICAL DATA

PARTICULARS	VALUE
Manufacturing process	**Cast / blown film**
Film structure	**Multi-layer**
Material	**LLDPE**
Thickness	**20–30 µm**
Width	**250–750 mm**
Roll length	**1,500–1,800 m**
Core diameter	**3 inch (76 mm)**
Cling	**Inside**
UV protection	**Up to 18 months**
Colours	**White, green, light green, black, transparent; custom on request**

STANDARD SIZES

REINLAND-60 EVERYDAY WRAP

Cost-effective wrap for regular dairy and fodder use

WIDTH	LENGTH	THICKNESS	UV PROTECTION	COLOUR
250 mm	1,500 m	25 µm	10–12 months	Green, Light green, White, Black
350 mm	1,500 m	25 µm	10–12 months	Green, Light green, White, Black
500 mm	1,800 m	20 µm	10–12 months	White, Transparent
750 mm	1,800 m	20 µm	10–12 months	White, Transparent

REINLAND-400 LONG STORAGE

Premium wrap for long-term storage and strong sun

WIDTH	LENGTH	THICKNESS	UV PROTECTION	COLOUR
500 mm	1,500 m	20 µm	18 months	Green, Light green, White, Black
750 mm	1,800 m	20 µm	18 months	Green, Light green, White, Black

STORAGE AND HANDLING

Keep rolls in their carton, standing on end, in a cool, dry place out of direct sunlight until use. Handle by the core and avoid dropping rolls on their edges. Export orders: widths, thickness, colour and roll length can be set to your market.

THE WARRANTY

This product is supplied to the agreed specification. Performance may vary with application, machine settings and storage conditions. No warranty is implied beyond our standard manufacturing quality assurance.

WHERE IT IS USED

01

Dairy farms

Maize and grass silage for year-round feed.

02

Fodder producers

Bales wrapped for sale and long storage.

03

Agricultural contractors

Runs on standard bale wrapping machines.

04

Bale makers

Small and medium balers, 250–750 mm film.

HOW TO ORDER

Send the width, thickness, roll length, colour and quantity you need. Prices depend on size, quantity and delivery location, so we quote every order. GST invoice in India; FOB or CIF for export.
